

Double click on the icon named 'Windows Explorer'

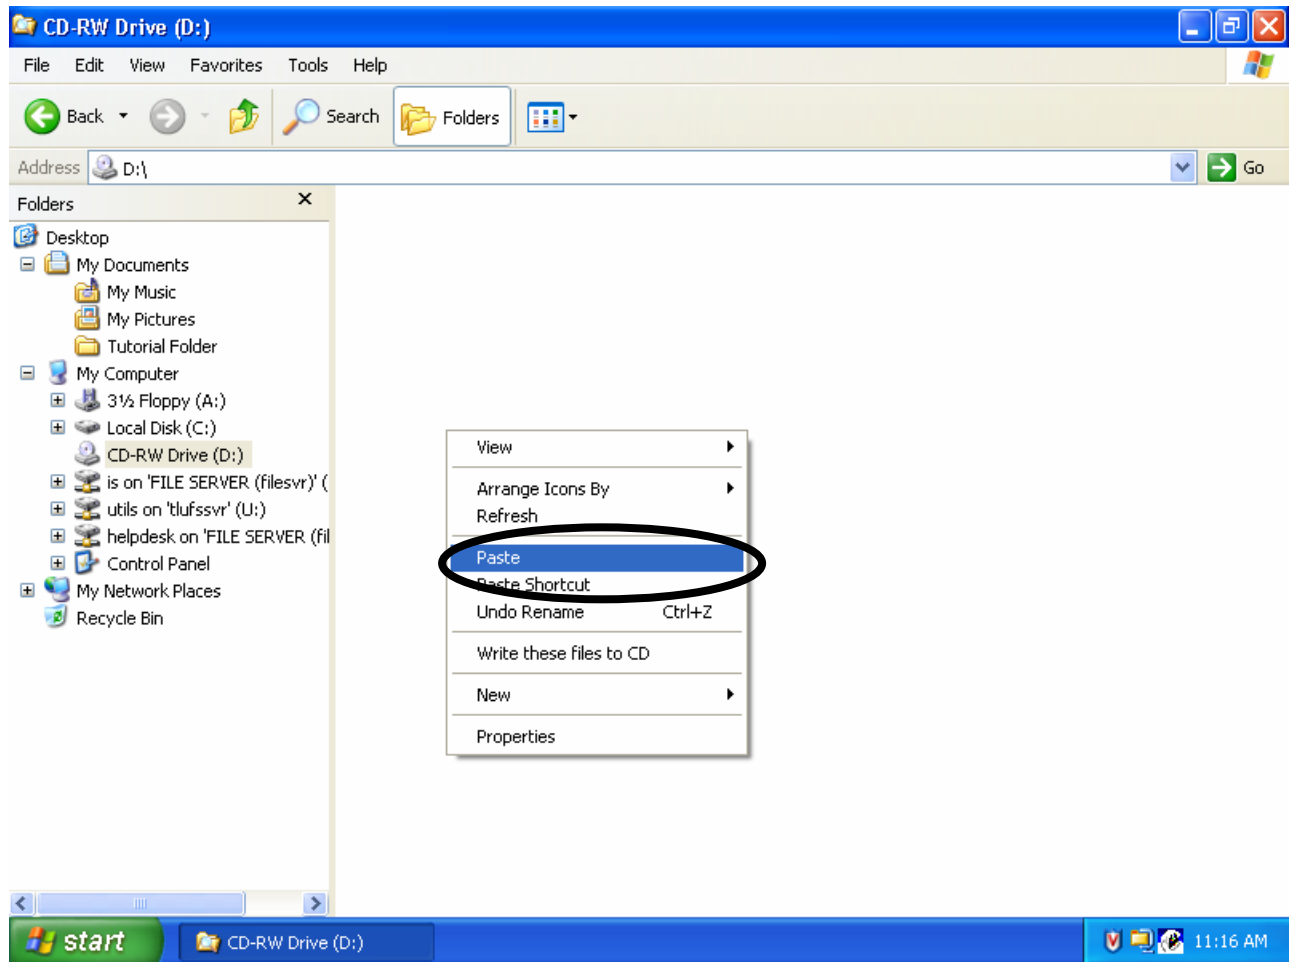

This is the 'Windows Explorer' window. You can search for your file here.

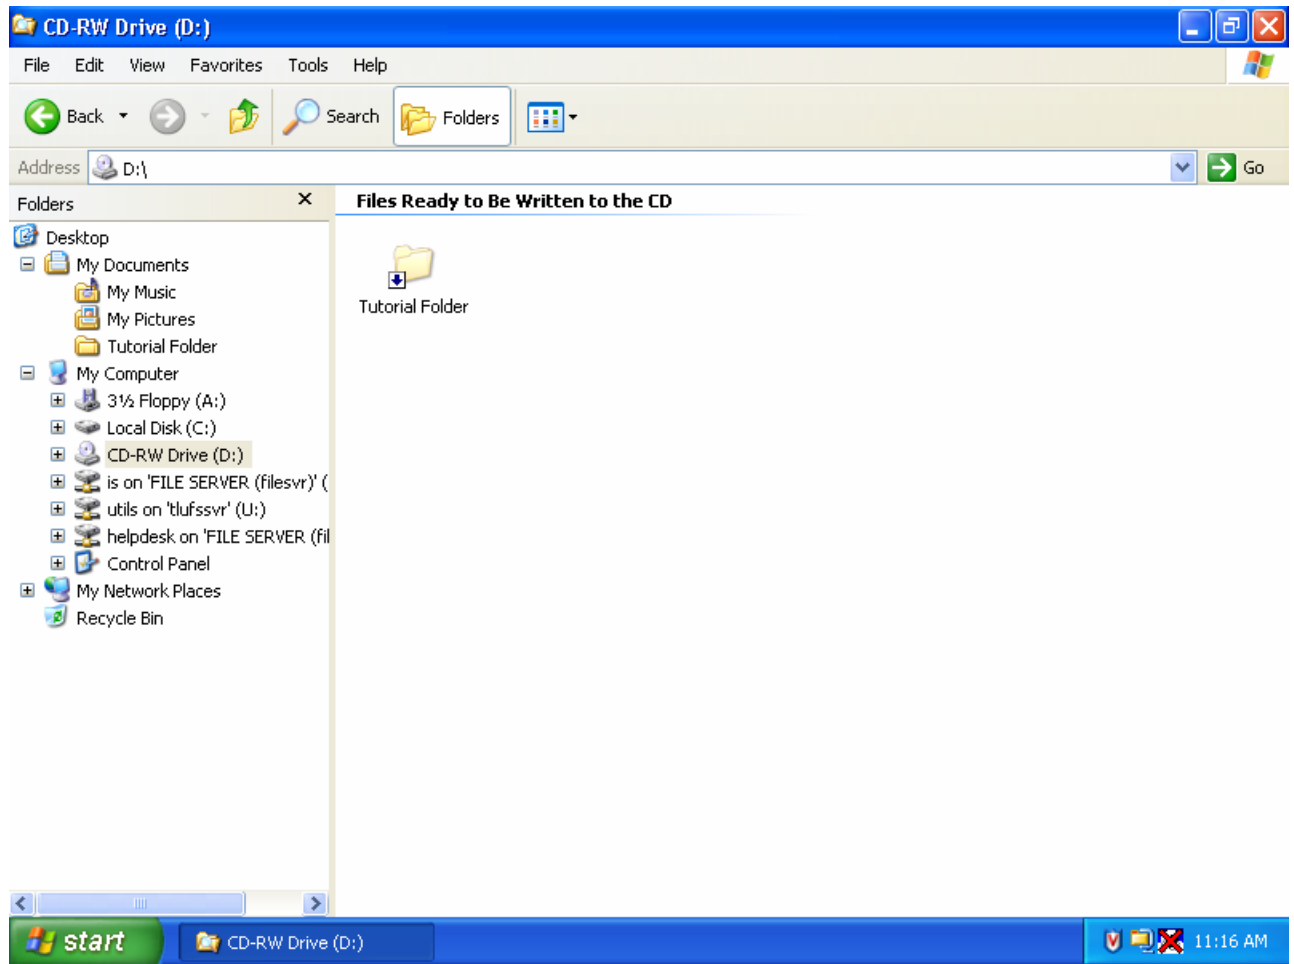

Once you locate your file you can right click on it to get a menu. You want to copy the file.

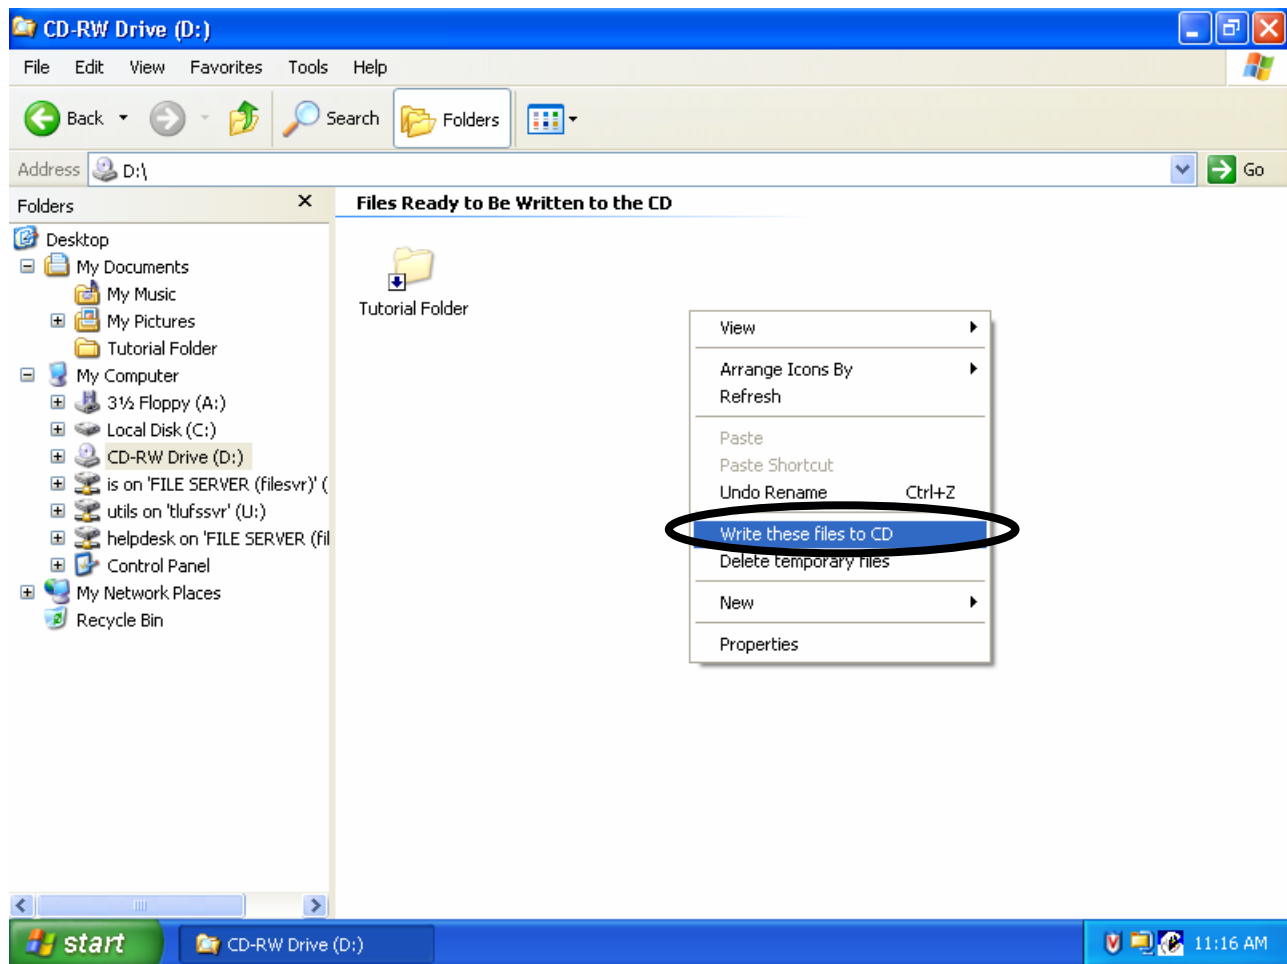

After copying the file you want to locate the drive in which you will be placing it in.

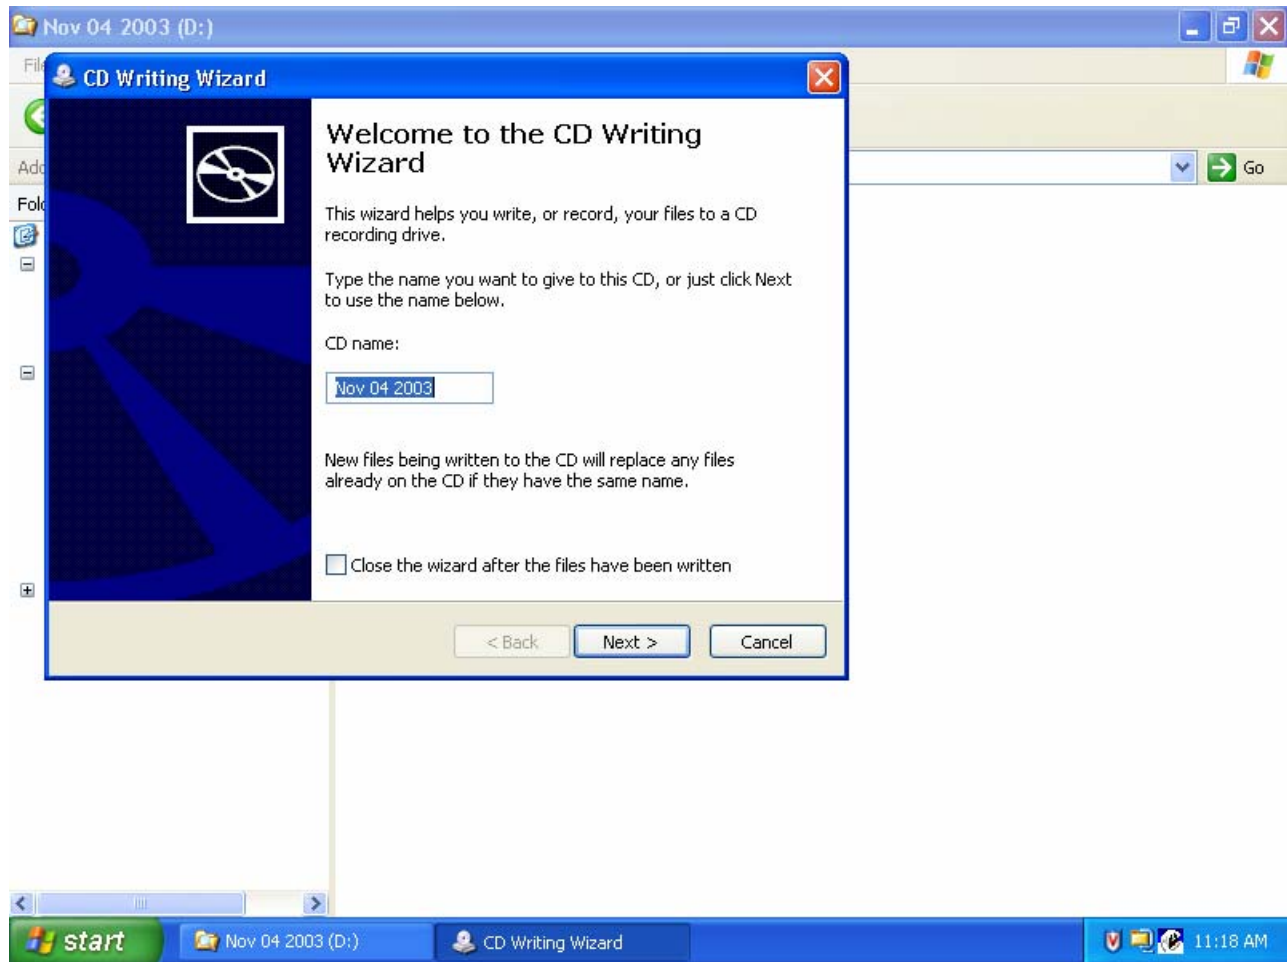

After locating and clicking on the drive you wish to copy to. Right click on the blank area and click paste.

Pasting will place the file into the drive you wish to copy to.

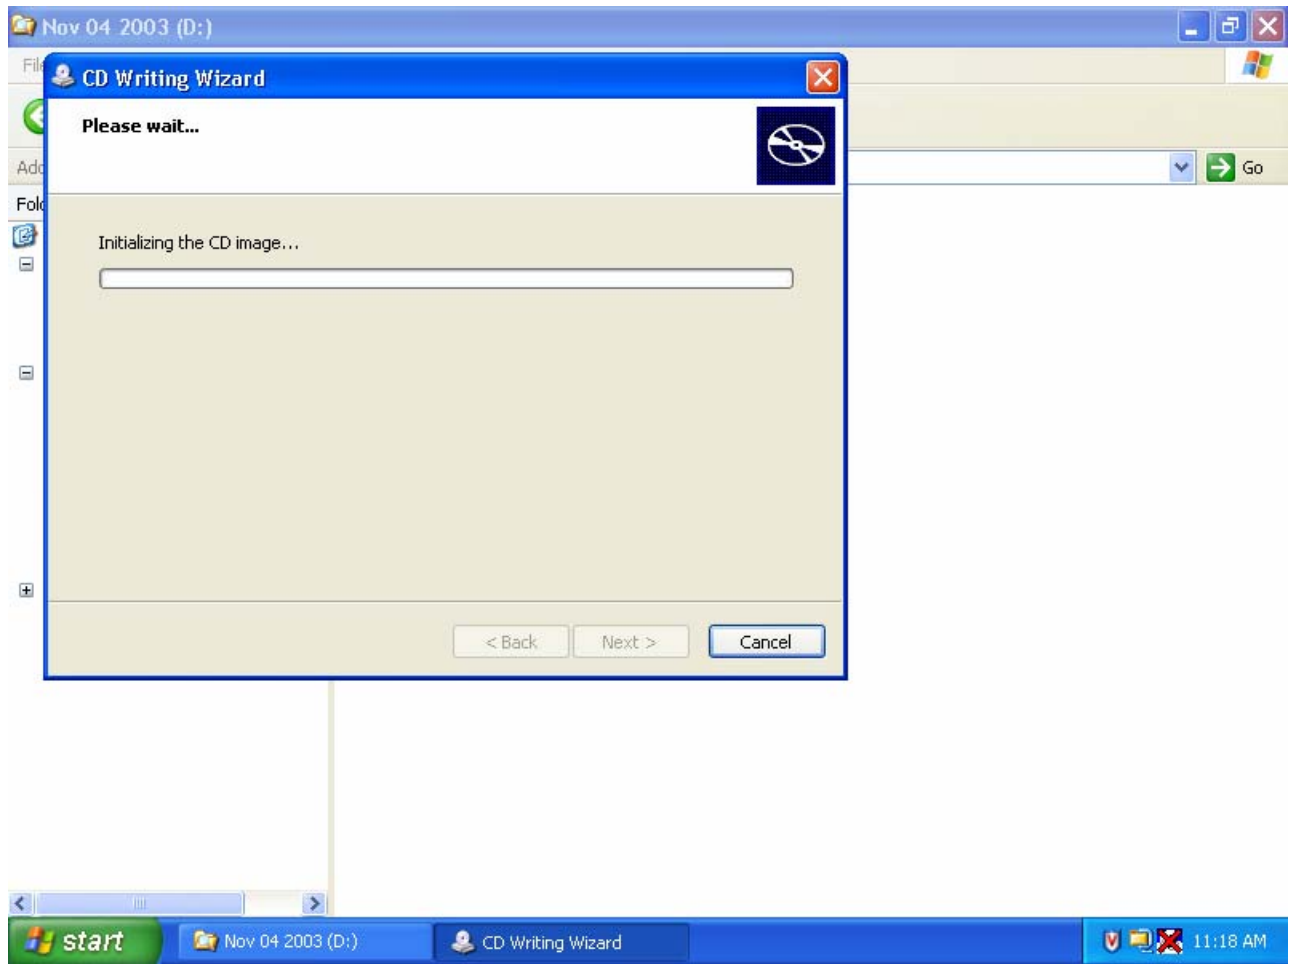

Right click in the blank area and go to 'Write these files to CD'. This will start the CD Burning Wizard.

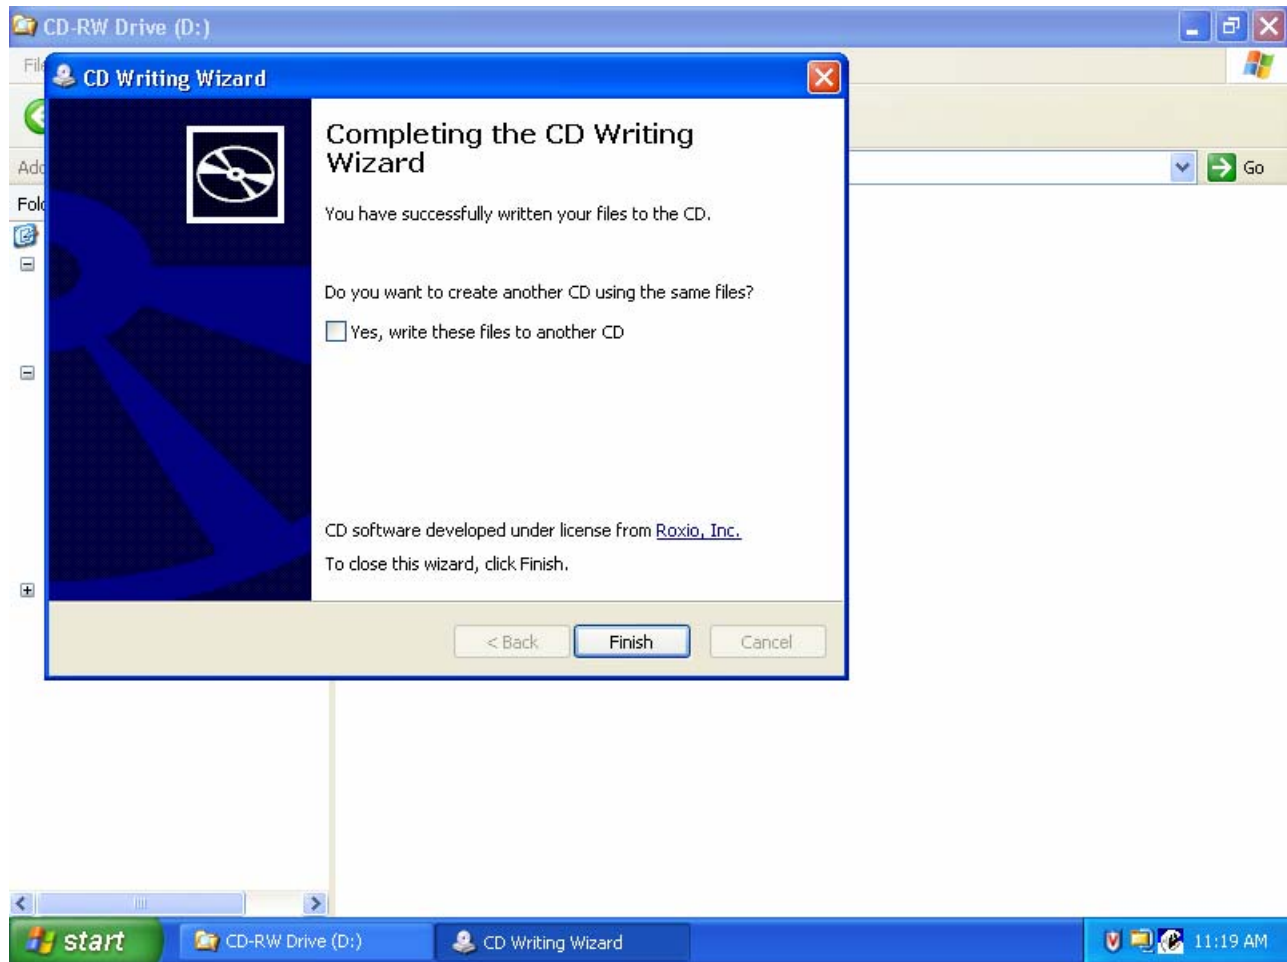

In this window you can name the CD. Enter the desired name and click 'Next'.

This process is automatic. After you click next the computer will automatically burn the file or files to the CD.

After the process is complete click finish. If you wish to burn the files to another CD click the dialog box that says 'Yes, write these files to another CD'.

Remove your CD from the CD-RW drive.
